CELONIS DATA ENGINEER CERTIFICATION EXAM

Before you begin the Certification Exam, please review the following:

1. You are allowed **2 hours and 30 minutes** to complete the exam.
2. You are only allowed **3 attempts** to pass the exam. The 2nd attempt will be free, but the 3rd attempt will require an additional fee.
Note: Exam questions will be unique and change on every attempt.
3. To pass the exam, you must score **80%** of all possible points.
4. Once you start the exam, you **CANNOT** pause and resume.
5. ***Please make sure your internet connection is stable before beginning the exam.***
6. Every question when working with "Process Analytics" will be independent from each other, so please remember to clear any existing filters you may have applied throughout the exam.
7. Exam questions will be either be single answer multiple choice, or multi-select responses.
8. Use the guide provided in the next section to log into your personal training team. Before you begin the training, please have two tabs open:
 - Training Platform to answer the questions.
 - Personal IBC Training Team to base your answers off.
9. The exam will consist of three different portions:
 - First portion of the exam: Work with the analysis "Certification Exam - Process Discovery_O2C_EN" in the workspace "Certification Exam - Process Discovery" to answer the exam questions.
 - Second portion to the exam: Create your own analysis in the workspace "Certification Exam - Analysis Building" to answer the exam questions. Remember to have your personal IBC team open before starting the exam.
 - Third portion of the exam: Work in the Event Collection to create a Data Pool
10. Please make sure you have a thorough understanding of [Vertica SQL](#).
11. We advise to do the Accounts Payable Case Study (Process Connection Advanced). The Case Study serves as a useful resource in preparation of the exam.
